4800 Oak Grove Dr.
Pasadena, CA 91109
rlmattingly@aeroconf.org

Abstract—This paper serves as an example for the use of the L^AT_EX class file for the 2027 Aerospace Conference. The L^AT_EX class file for the 2027 conference has been modified from that of prior year conferences in order to fix minor bugs and to conform to new formatting requirements. Within the class file there are some customized commands that are illustrated in this paper. They are: tableofcontents, acknowledgements, thebiography. There are also comments sprinkled throughout the .tex file to illustrate the usage of the class file. If you have difficulties or errors using this class file, please contact me at the e-mail address in the author's information slot. Some of the content below is filler designed to show you how a properly formatted paper should look.

Proper formatting of your paper as specified in this document contributes to the successful production of these documents. All papers are also published in PDF format on the *IEEE Xplore* web-based system, shortly after the conference concludes.

A double-column format is required, although figures, tables, and equations may be full-page width. Specifications are listed for typeface, type size, headings, column separation, margins, and other style parameters.

Where this document is silent on a formatting question, it is because it is not important or is the writer's option. When in doubt make a choice that makes your document most readable. English is the official language of the conference, and the official page size is 8.5 x 11 inches. Do not use A4 paper size.

1. INTRODUCTION

The annual IEEE Aerospace Conference is a venue for engineers and scientists to present their work to one another. Please submit a paper only if you or a coauthor are committed to attend and present it personally. **Papers not presented at the Conference will NOT be published in the 2027 IEEE Aerospace Conference Proceedings on IEEE Xplore.**

An IEEE Aerospace Conference paper is comprised of standard parts described in Section 3 of this paper. Section 4 briefly describes the manuscript style and Section 5 the submission deadlines and procedures. Section 6 discusses presentation of papers at the conference. The Best Paper Award and paper publication are described in Section 7. Section 8 provides a summary.

2. RESPONSIBLE USE OF AI

Per the guidelines from the IEEE, any use of AI in the writing or preparation (figures, charts, tables, etc.) of a manuscript should be disclosed in the Acknowledgements section of the paper. Detailed information on the guidelines can be found at the IEEE website below. General guidance is that authors should acknowledge any use of AI, along with the system used, specific sections of the manuscript that are affected, and an explanation of the level at which the AI system was used to generate content.

[IEEE AI Policy](#)

3. PAPER ORGANIZATION

IEEE Aerospace Conference papers consist of a minimum of nine parts.

Title

The title should indicate the subject of the paper as briefly as possible. The maximum length, including spaces, is 100 characters.

Author(s)

Names of all authors, their affiliations, postal addresses, phone numbers, and e-mail addresses should follow the title, centered on the full width of the page. Do not include titles or degrees except for military rank. Multiple authors may be listed two or three across and as deep as needed. Large numbers of authors should be grouped by address.

Abstract

An abstract of 250 to 500 words should concisely describe the work being reported, its methodology, principal results and significance.

Table of Contents

Major headings and their page numbers are listed in the Table of Contents.

Introduction

The introduction provides background information, such as previous work, and describes how the paper is organized.

Body

The body describes the work in detail and discusses its application. The body should be organized into logical sections with headings and subheadings and be illustrated with figures and tables. Subsidiary information can be relegated to footnotes.

Conclusions

Conclusions should clearly state principal results of the work, its significance, limitations, advantages, and applications. Recommendations for further work are also encouraged.

References

List and number all bibliographical references at the end of the paper.

Biography

Provide a short biography for each author, which can include title, fields of expertise, work experience, education, and relevant personal information. Also include a 1.25 inch wide x 1.5 inch high headshot (at 300 dpi) of each author.

Additions

Add appendices and acknowledgments, if appropriate.

4. MANUSCRIPT STYLE

Paper Length

The paper may be 6 to 20 pages in length.

Copyright Notice

A copyright notice must be placed as a footnote on the first page of the paper. Do not number this footnote. Choose an appropriate alternative from the list of four below:

- (1) For papers in which all authors are employed by the US government, the copyright notice is: **U.S. Government work not protected by U.S. copyright**
- (2) For papers in which all authors are employees of a Crown Government (UK, Canada, Australia), the copyright notice is: **979-8-3315-7360-7/26/\$31.00 ©2027 Crown**
- (3) For papers in which all authors are employed by the European Union, the copyright notice is: **979-8-3315-7360-7/26/\$31.00 ©2027 European Union**
- (4) For all other papers the copyright notice is:

979-8-3315-7360-7/26/\$31.00 ©2027 IEEE

Paper, Margins, and Spacing

Format your electronic submission to 8.5 x 11 inch page size in double-column format with 0.75 inch margins on each side, top and bottom. There should be 0.25 inch between columns, which are justified both right and left.

Lines of text should be single-spaced, except for double spacing before headings and space-and-a-half after.

Headers and Footers

No headers are permitted. Utilize footers only for page numbers, which are centered at the bottom of each page.

Headings

Major Headings—Centered in the column with a double space before and space-and-a-half after.

Subheadings—Italicized and placed flush on the left-hand margin on a separate line. Use a double space before and space-and-a-half after.

Subsubheadings—Italicized, followed by an em dash and run in at the beginning of the paragraph. This paragraph has a correctly formatted subsubheading.

Other Elements

Equations—Equations should be centered in the column. When numbering an equation, enclose the number in parentheses placed flush with the right-hand margin of the column, as shown in the sample equations that follow.

$$\mathbf{F} = m\mathbf{a} \quad (1)$$

$$e = mc^2 \quad (2)$$

Mathematical derivations and proofs should be developed in appendices.

Figures—Place figures as close to the text reference as possible. Center figure titles directly below the figure, as shown in Figure 1.

Figures should be sized for easy reading. No lettering in a figure should be smaller than 10 points. Scan photographs at a 300-dpi resolution and embed them in the paper. High-resolution images should be reduced to 300 dpi at the size they will be printed.

Tables—Place tables as close to the text reference as possible. Use the full width of the page for legibility, if required. Center table titles directly **above** the table.

Footnotes—All footnotes²following the IEEE copyright notice are numbered consecutively.

5. PAPER SUBMISSION

Submission due dates and deadlines are given in Table 1.

Abstract

An abstract describing the planned content of the paper must be submitted to the conference website. Following review

²This is an example of a Footnote.

Figure 1. Here is an example of a figure that spans both columns.

Table 1. Summary of Due Dates

Event	Due Date
Abstracts Due	July 1, 2026
Paper Deadline	October 2, 2026
Final Revised Paper Deadline	January 8, 2027
IEEE Copyright Form Due	January 8, 2027

and approval of your abstract, you may submit a paper.

Review Paper

The paper submitted for review must be a complete, fully formatted, and proofread manuscript, ready for publication. NO paper submitted for review after the deadline will be reviewed or admitted to the conference.

Final Paper

Following receipt of review comments, make appropriate revisions to the paper and submit a final version for publication.

IEEE copyright Form

An IEEE Copyright Release Form for each paper, signed by the author or author's employer, is due with the final paper.

Copyright forms are available at the conference website and can be submitted electronically at the IEEE site linked for this purpose or by mail to the address provided on the website.

ITAR Compliance

International Traffic in Arms Regulation (ITAR) controls the export and import of defense articles and defense services as detailed in the U.S. Munitions List [1].

Authors who are U.S. nationals (including green card holders), work for a U.S.-based organization regardless of where

they are physically located, or work at a U.S. location of a non-U.S.-based organization, must ensure that ITAR compliance has been obtained for any and all papers submitted to IEEE for publication.

Organizational Approval

Authors are expected to obtain any needed clearances for their work to be freely published by the IEEE. Submission of your paper implies that it has received the proper clearances from your company, affiliation, or organization.

Submission to the [IEEE Aerospace Conference](#) website

Submit a PDF version of your abstract of paper via the website.

6. PRESENTATION AT THE CONFERENCE

Prepare a presentation to be delivered at the conference, using Microsoft PowerPoint or similar software, that summarizes the major concepts of your paper.

Allotted Time

Time allotted for presentations is 18 minutes, with an additional 5 minutes for questions. The time limit will be strictly enforced.

Projection

A projector and screen will be set up in each meeting room. Bring your slide set on a laptop to plug in to the projector. Also bring a copy of your presentation on a USB drive, in case your session chair chooses to consolidate all the presentations on a single laptop before the session starts.

Presentation

Tips on giving the presentation will be sent to registered authors in advance of the conference.

Figure 2. A single column figure.

Special Displays

Displays of hardware or software an author believes to be of wide interest to conference attendees may be set up with permission of the Technical Program Committee and by special arrangement with the Conference Manager.

7. BEST PAPER AWARD AND PUBLICATION

Best Paper Award

A Best Paper Award is given each year for excellence in technical innovation and exposition in the written paper. The selection is conducted prior to the conference and the award is presented at the Conference.

Publication

Papers presented at the IEEE Aerospace Conference are published in two forms:

- 1) On an online database accessible by registrants
- 2) In the official Conference Proceedings on the web-based *IEEE Xplore* System following the conference

8. SUMMARY

This Author's Instructions document serves as a template for papers prepared for the 2027 IEEE Aerospace Conference. All paper submissions are accomplished online, through the IEEE Aerospace Conference website at www.aeroconf.org [2].

APPENDICES

A. MORE INFORMATION

This is the first appendix.

Comments

If you have only one appendix, use the "appendix" keyword.

More Comments

Use section and subsection keywords as usual.

B. SUMMARY OF FORMAT REQUIREMENTS

Paper size: 8.5 x 11 inch

Number of pages: 6–20

Margins

Top and bottom: 0.75 inch
Left and right: 0.75 inch

Columns

Number of columns: 2
Space between: 0.25 inch

Font: Times Roman 10 pt regular, unless otherwise noted

Text

Line spacing: Single
Space after paragraph: 10 pt
Paragraph indent: None
Justification: Left & right

Title

20 pt bold, upper & lower case, initial caps on all words
except articles, conjunctions and prepositions
Centered on the full-page width
Maximum length 100 characters

Author(s)

10 pt bold, upper and lower case
Centered on the full-page width
Name, affiliation, postal address, phone number, and
e-mail
No degrees or titles, except military rank

Abstract: 9 pt bold

Acronyms: Define acronyms on first usage

Page numbers: Bottom center of each page, including first page

Footnotes: 8 pt regular

Headings

Spacing before major or subheadings: Double space
Spacing after major or subheadings: 1.5 space
Major headings: 12 pt small caps, bold, centered
Subheadings: 10 pt italic, flush left, separate line
Subsubheadings: 10 pt italic, run into paragraph with
em dash

Headers and Footers

No headers
Footers used for page numbers and
Copyright notice on page 1

Equations

Centered in column

Equation numbers in parentheses, flush right
Include special fonts with the paper.

His career started with systems integration on the Apollo program for North American Rockwell.

Figures and Tables

Captions and titles: 10 pt bold
Figure captions: Centered directly below figures
Table titles: Centered directly above tables
Scanned images: 300 dpi JPEG

References

List references at end of paper.
References numbers: In square brackets []

Biography

Each author's name in bold italic
Brief biography in 10 pt italic
Photo of each author

ACKNOWLEDGEMENTS

Project sponsors may be acknowledged in this section. If AI was used in the preparation of the paper, the acknowledgement should be included here.

BIOGRAPHY

Erica Deionno received her B.S. and Ph.D degrees in chemistry from UCLA. She is currently a Principal Director in the Defense Systems Group at the Aerospace Corporation. During her 17 years at Aerospace, she has held numerous roles, including several lead positions in Aerospace's Innovation office. She also spent over 10 years conducting research in the Laboratories at

Aerospace, where her work included radiation testing and modeling of emerging resistive RAM technologies and modeling space solar cell degradation.

Richard Mattingly received a B.S. in Engineering from California State University, Los Angeles in 1970. Recently retired, he had been with JPL for more than 40 years. He has been studying Mars Sample Return (MSR) and future missions in the Mars Exploration Program Office at JPL. Prior to MEP, he supervised a systems engineering group for JPL's projects implemented in part-

nership with industry. He has also managed systems engineering groups for instrument and payload development and has been involved in the formulation and development of numerous planetary and Earth-orbiting spacecraft and payloads.
